

Method 4: The Optimum Focus point system

Working towards the National Standard

This is the stage that most children will be in for most of the year, i.e. they are demonstrating typical attainment for their age – they are working towards attaining the end of year expectations (the National Standard).

Three stages in order to differentiate and evidence in-year progress.
WT – Red (Working Towards at Red); WT – Amber; and, WT - Green.

What differentiates the stages? WT-Red = Meeting 25% of the expectations;
WT-Amber = Meeting 50% of the expectations and
WT-Green = meeting 75%+ of the expectations.
